

1<sup>st</sup> Announcement and Call for Abstracts

## **Characterization of Deep Geothermal Systems**

12-13 October 2017, KIT, Karlsruhe

This workshop aims at discussing new approaches, methods or data in the fields of deep geothermal reservoirs for energy exploitation, with a strong focus on on-going research. It proposes a platform of scientific exchange, especially between PhD students and scientists. We encourage PhD students and young scientists involved in geothermal reservoir technology to present their recent research and ideas.

### **Keywords:**

- Reservoir exploration
- Reservoir monitoring
- Reservoir modelling
- Reservoir engineering and operation

### **Important dates:**

- 10 Sep. 17: Extended abstract submission deadline (incl. registration)
- 24 Sep. 17: Registration deadline

### **Registration & Detailed Information:**
